Case studies will illustrate five ways – some reliable and others not – that genealogists “prove” an ancestor’s identity: using information provided by others; using a single source; following a chain of evidence; correlating evidence from multiple sources; and weighing conflicting evidence. Attendees will learn how to use the GPS to identify their ancestors accurately.
10:30 – 11:30 A.M. **THE POWER OF DNA: GENETIC GENEALOGY BASICS** – *CeCe Moore*. Understanding the basics of the four types of DNA and three types of genetic genealogy tests is essential to successfully applying genetic genealogy to furthering your research. Explore the power of DNA to discover more about genealogy and extend family tree branches. This presentation helps to lay the foundation for genealogists interested in adding genetic genealogy to their skill set.

3:00 – 4:00 P.M. **AUTOSOMAL DNA: DISCOVERING YOUR ANCESTORS IN YOU** – *CeCe Moore*. We have all invested a significant amount of time and effort searching for information about our ancestors. Rapidly advancing genetic technologies have now made it possible to discover more about our ancestors and in ways we never could have imagined. CeCe will demonstrate the methods that the experts use to get the most out of their results, including chromosome mapping, trait tracing and applications for adoption search. Examples from CeCe’s research will be shared to demonstrate the potential for using autosomal DNA to discover more about our ancestors.
4:30 – 5:30 P.M. **INFERENTIAL GENEALOGY: DEDUCTING ANCESTORS’ IDENTITIES INDIRECTLY** – *Thomas W. Jones*. Participants will learn how to accurately deduce ancestors; identities & many aspects of their lives by digging below “surface information” in genealogical records and by combining information from several sources.

It is important to understand the strengths and weaknesses of this aspect of DNA testing and the reasons behind them. Attendees will learn how to better interpret and analyze these results and what they can and cannot tell you about your family tree.
